IDEATION PHASE

Brainstorm & Idea Prioritization

Project: Electric Vehicle Performance and Insights

Date	2 November 2026	**Team ID**	_____
Project Name	Electric Vehicle Performance and Insights	**Maximum Marks**	As specified in original template

Step 1: Brainstorm and Idea Listing

The following ideas were considered for turning the EV market dataset into a useful, easy-to-explore analytical project. Team-member names are intentionally left blank for completion.

S. No.	Team Member	Idea / Suggestion	Category	Group No.
1	Ishal khan	Compare annual EV sales by manufacturer and market region.	Sales Analysis	1
2	Ishal khan	Explore sales distribution by vehicle category and model year.	Market Trends	2
3	Ishal khan	Analyze battery-type contribution and vehicle performance indicators.	Technology & Performance	3
4	Ishal khan	Build an interactive Tableau dashboard with KPIs and region/year filters.	Dashboard & Reporting	1

Step 2: Idea Prioritization

Ideas were rated using practical project feasibility and their importance to the project objectives. Priority is expressed as High, Medium, or Low.

Group No.	Final Idea	Feasibility	Importance	Priority	Selected
1	Create a Tableau dashboard with core EV sales KPIs and interactive Market Region / Model Year filters.	High	High	High	Yes
2	Analyze EV sales by category, model year, and manufacturer to reveal market patterns.	High	High	High	Yes
3	Compare battery types and vehicle performance measures such as range, efficiency, price, and customer rating.	High	Medium	Medium	Yes

Prioritization outcome: The selected direction was to develop a Tableau-based EV market analysis dashboard supported by multiple worksheets, KPI views, calculated fields, interactive filters, and a Tableau Story.
